Housing Amenities

Housing for winterXtreme will be assigned by Camp Timber-lee based on group size. If your group has special considerations due to a camper with physical limitations please let the registration office know as soon as possible for planning purposes.

All housing areas have indoor plumbing with restrooms and showers adjoining the sleeping spaces. Buildings have ample electrical outlets and are heated and winterized to provide comfortable temperatures for sleeping as well as dry spaces in the event of poor weather.

Beds are slid frame wood with firm springs under a standard twin size mattress. Room sizes range average 5-9 people per room and vary by cabin.

If you have any questions regarding housing, please contact Timber-lee's registration office.
